

PLANNING AND COMMUNICATION LOGS/NOTES

BRD:

Business Requirements Document

The proposed solution for the smart visiting card is to build an interactive mobile application. Register the user, get the details corresponding and generate the QR Code. The User could also scan fellow user's QR Code to give a LinkedIn Connection request. Finally get a success message.

Tasks Detailing:

- 1)UI design
- 2)User Registration
- 3)User Login
- 4)User account verification
- 5)QR Code generation
- 6)QR Code Scanner
- 7)Mail Sender on successful scanning
